

AZ Compliance

*We've redefined legal services.
In today's world legal risks are
increasingly more difficult to identify,
assess and prevent*

We created a unique model based on prevention

At AZ we've redefined legal services in Chile, creating a unique and efficient model: AZ Compliance, a different way of developing precise solutions under a comprehensive outlook, for each stage of your company, whether it's a Start Up, Family Business or In-House Legal Counsel.

AZ Compliance is a preventive and systematic model for managing legal and regulatory risks, responding to current needs, where the strategy for each company, its partners, directors, and senior management (Corporate Governance) is to adopt an active management role and be clearly informed of rules and regulations that directly or indirectly impact their activities. Through this, we are able to comply with current regulations and

their progressive changes, making it possible to prevent breaches and sanctions that will affect both the liability of persons and the value of a company's assets.

At AZ, we possess a focus and work structure based on preventing and managing legal and regulatory risks, innovating the traditional manner in which legal services are rendered in Chile.

AZ COMPLIANCE

Precise solutions that combine prevention, innovation and a comprehensive outlook for each stage of your business, whether it's a Start Up, Family Business or In-House Legal Counsel
