AZ EXTERNAL LEGAL COUNSEL

AZ's External Legal Counsel continuously works in monitoring the company's internal activities and providing legal solutions more efficiently with shorter response times

At AZ we created the AZ External Legal Counsel (ELC), an innovative tool reflecting our hands-on and full-service style. This unique service offered by Albagli Zaliasnik arose from an unresolved need the market was facing and essentially consists of working just like one more management team within the company, externally inserting our legal team. Through this service we can manage, articulate and resolve all legal and regulatory needs each company requires, in relation to the stage they're in and the industry in which they participate.

This unique and efficient work model adapts to each type of client, allowing us to monitor the company's internal activities and provide legal solutions more efficiently with shorter response times.

Companies permanently interact with clients, suppliers, competitors, and regulatory entities. During each of these interactions, different needs and contingencies arise which the AZ External Legal Counsel is capable of actively resolving. We work directly with senior management, both with respect to recurring activities inherent to the company's line of business and to strategic aspects companies must face from time to time.

This model incorporates management control tools such as corporate and regulatory compliance, preventive due diligence, executive summaries of contracts with contingency analysis, and consolidated reports.

The AZ External Legal Counsel allows companies to:

- *Reduce Costs*
- *Optimize Processes*
- *Improve communication between management teams*
- *Streamline response times*
- *Effectively adopt the legal industry's best practices*

We manage, articulate and resolve all legal needs within the company

External Legal Counsel (ELC)

*An efficient and innovative way of working
to deliver legal services*
